Walter married Mary Rosalee Vickory on October 21, 1933. After 72 years of marriage, they still reside together in their home in Bonham, Texas.

Young Walter became a member of the Calvary Baptist Church of Bonham at the age of 19. Over the years, he contributed many hours of work to the church. He was active in Little League and Boy Scouts with his sons, Jerry Park of

pigs, and chickens. He raised show chickens as a hobby for many years. He took his birds to County Fairs, the Dallas State Fair, and the Fort Worth Fat Stock Show, where he took home many award ribbons.

Walter was an avid gardener and supplied his family's tables with fresh vegetables from his backyard.

After 35 years of employment, Walter retired from the Southwest Pump Co. in Bonham, and became a part time farmer. He could string barbwire and bail hay till the sun went down.

Walter still enjoys his children, grand and great-grand children coming to visit. He doesn't travel much anymore, but one thing he does still enjoy is eating. If the world runs out of Hot Chicken Wings, it will be because of Walter D. Park.

The loss of a "Wall of Famer"

Thousands of C.C.H.S. students knew him as an "Ag" teacher at Clinton County High School, but I knew him first as a basketball and sports figure and fan and like many, the loss last week of Raymond Reneau was especially hard.

I was driving down the road last Friday morning when the thought hit me that the death of Raymond Reneau represented the first loss of a member of our Clinton County High School Basketball Wall of Fame (John "Buck" Butler was elected posthumously).

I immediately picked up the cell phone and called C.C.H.S. Principal David Warinner and told him that if it was at all possible, Raymond's induction plaque should be temporarily removed from the "Wall" and placed on display during the visitation hours. David agreed and said he would immediately do just that, and those who attended Raymond's visitation were in fact able to also see the Wall of Fame plaque.

Raymond's coaching career at Clinton County High School began with the 1942-43 season and was interrupted by World War II, when L.H. "Prof" Robinson took over and continued to coach in Raymond's absence through the 1944-45 season.

Upon his return, Raymond took the reigns again and coached the 1945-46 season, along with four additional seasons, ending his coaching career with the 1959-50 season.

In all, Raymond finished his career with an 80-43 overall record.

I'm not old enough to remember Raymond's years as head coach for Clinton County High School's Bulldogs, but I do remember in later years when Raymond was the official timer, first at the old high school gymnasium, then later at the new, and present, high school gym, which is now known as the Lindle Castle gymnasium.

One of my most vivid memories from high school is noticing just how straight and proud Raymond sat at the sidelines behind the clock controls as Clinton County hosted their first ever 16th District Tournament in the "new" gym in 1973. I had seen him sitting there countless times, but never quite like this. For the tournament, he was wearing a striped official's shirt - and he was wearing it with pride.

Raymond's official timer duties began with the 1954 season, and continued until his retirement from teaching school in 1975. But his retirement didn't end his love for the game, and especially his love for the "kids" who were the blue and white uniforms for Clinton County High School.

In high school, I carried a large pocket knife daily, as most boys did (imagine that - we didn't stab anyone with our weapon, we just thought we were supposed to carry a knife) and from time to time, I would take that knife to the FFA room to let "Mr. Reneau" give it a good sharpening. Once, after a knife trade, Mr. Reneau worked for awhile on my new knife, then simply handed it back to me and said I had made a bad trade - the new knife "wasn't worth a dime" and wouldn't hold an edge.

But it was much later in life that I came to really appreciate the man, Raymond Reneau. In fact, it wasn't until Ronnie Guffey began compiling his basketball history that I realized that Raymond had actually served so many years as head coach, and had compiled a quite impressive record.

I've been on hand for every single Wall of Fame induction and have been a member of the nominating committee since it's inception. I don't think I have ever seen a member accept their plaque with the pride and emotion that Raymond did on that night when we brought in the third class in 2000.

When we inducted Raymond in 2000, he continued to hold the record for winning percentage of any former head coach with a winning mark of 65 percent.

During his brief thank you address, he continued to talk about what his coaching and clock keeping years had meant to him, and like a true coach who could never get it out of his blood, he referred to his players several times, not as players, but as his "boys".

When Raymond would stop by the office, he would always leave making me feel like I was one of the best friends he had ever had - but that was one of the qualities of the man - unless you had seriously wronged him, you were truly one of his best friends. He always asked about my wife, Janie, and then about our two sons, calling them by name and telling me what good boys they both were.

Then, if time permitted in both of our schedules, and when Raymond came in, I always made the time, there was always a story or two.

The last time Raymond stopped by, of course he wanted to talk about the Lady Bulldogs and the season that had just ended.

"What a year they had," Raymond commented, ending the conversation by talking about several of the key players and calling them by name.

That confirmed to me that even 30 years after leaving his timer duties, and 55 years after his coaching years, he continued to read about and listen to the C.C.H.S. games. He loved the kids.

During my conversation with David Warinner last week, he summed up what many of us thought of Raymond with the simple comment "He sure was a good one, wasn't he."

Still, perhaps the best comment I heard about Raymond came from my wife, Janie, who was especially close to "Mr. Reneau."

"If there ever was a good man, Raymond Reneau was him."

GENERATIONS

It's funny to me how the things we are drawn to in life can teach us the lessons we need to learn. I have always loved gardening for example. I'm one of those folks who have always had potted plants everywhere, but when I bought my own home I finally had my own place to have a real garden. I never expected to learn the lessons it would teach me. I learned to let things take their own course instead of trying to control them every day. I can't make things grow! I learned patience on a much deeper level than I had known. And I learned the importance of a healthy environment in which to allow things to grow. Now, you might think those things are fairly obvious and I should have already known them. I did...in my head. I just didn't understand them in my being until gardening instilled them in me.

Another thing I've always been drawn to, and found so many lessons in, is genealogy. I find it related to gardening in a way. Seeds are planted, plants grow, they bear their fruit and they die. Human life is pretty much the same.

I've spent years scouring the countryside for old family photos and stories. I've asked everyone I know and met cousins I never knew about. I've found other genealogists around the country in every branch of family I have. I have to say that as a group they are some of the most generous people I've ever encountered. I've had people I've never met send me reams of information just because I emailed them once!

As I've looked into the faces of my ancestors through their photos and heard about their stories I've learned so many things about myself and about life. Besides just learning where my bald head comes from I've learned something of just how temporary this life is. All who came before me were born, lived their lives and passed on. Sometimes they left their marks in the lives of their descendents. Sometimes the only testimony of their lives are the silent monuments in forgotten cemeteries. They, like all of us, had a certain number of breaths. How they spent them has been largely forgotten.

When I began I wanted to be able to claim a famous ancestor somewhere...someone who had made their mark in history. What I found for the most part were farmers and blacksmiths. Oh, I have one ancestor who fought in the Revolutionary War, another in the War of 1812 and several who fought in the Civil War, including one who served on both sides! None were famous though. I find that I'm just as happy knowing that as if I'd found one who was a king. In a way I'm even happier to know they were all just ordinary people.

The long lines of begotten in the scriptures took on a new significance to me. Adam begat Seth, Seth begat Enos, Enos begat Cainan and so on, down to today. I now see in them a direct connection to God. All of us had ancestors that lived during every event in history. We are all directly connected to the past. Somehow that makes it all more real for me.

I've learned in a visceral way that we really are all related. And I've learned that we let most family connections just slip away through the years. We forget that we are connected because we become focused on our own day-to-day lives and the people in our immediate families. That's what family reunions are supposed to remind us of. We are connected. They Re-unite us. I've become close to cousins that I never knew existed a year or two ago. I can only wonder what life on earth would be like if we all realized that we're related. We're family.

Finally, I've realized that what I do as a genealogist is not ultimately for me. The photos and histories I've compiled belong to the next generation. They are the lessons yet to be taught...the insights waiting to be shared. I think everything we do should be seen in that light. My garden is healthy because the people who farmed my land before me took care of it. It falls to me to take care of my environment so it will be healthy when I pass it on. It falls to all of us...because our time here is only a few breaths and then we're gone.

We are thinking of....
